March 2, 1984

The Honorable Senator William Bradley
P.O. Box 1720
Union, New Jersey 07083

Dear Senator William Bradley:

We understand that the Central Intelligence Agency might be contemplating "negotiated" service contracts for building mechanical maintenance and engineering services for their installations.

Our firm, ISS Energy Services, Inc. is currently performing its varied services for the General Services Administration at the Department of Interior, Washington, D.C. (five buildings), the United States Geological Survey Building, Reston, Virginia and many other government buildings.

ISS Energy Services, Inc. is a wholly-owned subsidiary of ISS International Service System, Inc.

As the engineering arm of the parent corporation, ISS Energy Services, Inc. directs the operation of many facilities throughout the country, and also serves as consultants to all divisions in matters concerning the operation and maintenance of mechanical systems and computerized building automation systems.

It is our desire to be placed on the bidders lists for the following lines of business:

1. Building Mechanical Maintenance Services - including the staffing of boiler rooms, power plants, etc.
2. Maintenance Services on computerized building automation systems, life safety and support systems, and computerized energy management systems (such as those manufactured by Honeywell, Inc. and MCC Powers).
3. Mechanical Engineering Services - including the service, repair and evaluation and testing of:
 - a) Plant Equipment and Machinery
 - b) HVAC Equipment and
 - c) Pneumatic, Electronic and Electrical Controls, Control Systems and Instrumentation.

ISS Energy Services, Inc. provides maintenance staffing, HVAC, route service, controls and automation

services. It assumes responsibility for equipment that consumes, controls, converts and conserves

energy. ISS Energy Services is a wholly-owned subsidiary of ISS International Service System, Inc.

which provides a variety of building maintenance services in major cities throughout the United States.

If the Central Intelligence Agency is considering "contracting out" its services we would like to be considered for a proposal on any of its needs.

Enclosed are some brochures of ISS Energy Services, Inc. adequately detailing our services.

Your aid in this matter will be greatly appreciated.

Very truly yours,

Stanley J. Gross
Senior Vice President - Corporate
ISS International Services System, Inc.
